EXPERIENCE

Django Dev

HaGa IT Solution

04/2020 - 01/2025 Location

- Design database schemas using Django ORM and optimize complex SQL queries for speed
- Build and maintain RESTful APIs to enable seamless frontend and mobile app communication
- Integrate third-party APIs, services, and Python libraries into the core Django ecosystem
- Implement authentication, authorization, and data protection; write thorough unit tests and perform code reviews
- Work alongside frontend developers, UX/UI designers, and product managers to deliver cohesive web solutions

Django Dev

Seven Diff Software House

03/2017 - 01/2020 Location

- Django blog
- Python simple RESTfull API
- TF-IDF
- FastApi
- RESTful API is accessed using the HTTP protocol
- Naming and URL structure consistently will produce a good API and easy for developers to understand
- URLs APIs are usually called endpoints in their calls
- Example of naming URLs / endpoints the good ones are as follows: /users /users/1234 /users/1234/photos /usersMySQL CRUD
- SQL Trigger Concept

Flask Dev

Kya Grocery Store

11/2015 - 01/2017 Location

- Flask API
- CentOS
- Selinux System Administration

Python Qt Dev

RF Game Center

09/2007 - 05/2015

- PyQt billing creation
- Ubuntu, Debian, FreeBSD, CentOS SELinux
- Setup Apache2, NginX, Python, C++, Java, PHP, MySQL, MongoDB, SQL Server, Postgre SQL

SUMMARY

Backend developer focused on Python, Django, and API development, with experience building RESTful services, integrating third-party APIs, optimizing database queries, and supporting secure web applications. Works across backend architecture, Django ORM, SQL, authentication, testing, and cross-functional delivery to help web products run reliably and scale efficiently.

KEY ACHIEVEMENTS

Improved API Performance

Increased API performance by 30% using optimized Django ORM queries.

Secured Restful APIs

Implemented 100+ secure RESTful APIs ensuring seamless user data protection.

Multidisciplinary Teamwork

Collaborated in developing 50+ cohesive web projects with frontend teams.

Expansion Of Features

Integrated 20+ third-party APIs to enhance application functionality.

SKILLS

Python	Django	RESTful APIs	Flask
FastAPI	Django ORM	SQL	CRUD
Authentication		Unit Testing	
API Integration		Web Scraping	Selenium
BeautifulSoup		TF-IDF
